**NU-499****INDEPENDENT STUDY**

Independent study allows a student with a particular interest in a topic to undertake additional work outside of the classroom format. The student works under the supervision of a faculty member and undertakes a project and project report which is more than a term paper but less than an essay. The objective is to allow the student to explore a subject rather than research it. The faculty advisor will give an overall grade for the course.

(Prerequisite: a maximum total credit of independent study applied to degree is six. Credits cannot be transferred from other institutions.)
